IT - TEAM LEAD

Leading the development of scripts for Data Extraction, Scrubbing, Transformation and Loading. Aims to generate Structured Data(JSON) as specified by researchers based on their use case to generate sales in the construction industries across Asia, and the USA.

Implemented tools for Data Extraction and Optimization:

Applied Multiprocessing and Multithreading for parallelism, halved the run time for each source. (e.g. Data Extraction with BeautifulSoup and Selenium to handle multiple requests at the same time. Process data concurrently based on desired outcomes i.e., construction related information.)

Creation of PDF Extraction tool via implementation of Tesseract OCR API. Ease the process for developers to extract PDF contents whether it's in an Image or Text format.

Automation Scripts to reduced redundant task:

Creation of base templates for new sources.

Updating existing scripts with similar code.

Access and Deletion of irrelevant data from the S3 bucket.

AWS SMTP that generates a report for the running, failed, and successful task ran in Apache Airflow.

Data Management, Maintenance and Monitoring of sources. (1000+ Sources, 1000+ Tasks executed in Apache Airflow Daily).

Coordinating communication from researchers to developers v.v. to:

Resolve issues with existing and new sources.

Specification and Optimization on data extraction and output.

Management and tracking of workload through Jira Software.

Provide peer code review on GIT to ensure quality, optimization, and provide feedback, and training.

Set and Track team performance, goals and objectives.

Demonstrate effective collaboration, communication and presentation at various levels.

Successfully created scripts to automatically crawl websites to get data. (100+ sources)

Troubleshooting quality issues.

Monitor scripts and report issues.

Next Assignment

Kai has an amazing growth in automation and programing that potentially could be add value in this organizational areas.

2024-11-04:

Updated Next Assignment Quarter to OND 2026. Kaito will focus on building his technical mastery on the Workday Technology to support incoming and anticipated transformations w/in People Services. This will be done in a way that will also hone his communication and influencing skills. Leveraging his current SRE role with a bias on software engineering and automation, Kaito's next assignment should allow him to build on this strong foundation that he will gain at the end of his 1st role at P&G.

2025-02-25:

Next Assignment Quarter is kept at OND 2026. Kaito will continue to focus on building his technical mastery in Workay Technology and adjacent technologies focused on automation to help reduce toil within the processes.

This will continue to hone his communication and influencing skills.

2026-04-20:

Next Assignment Quarter is updated to 2027 AMJ. Kaito will continue to focus on building his technical mastery in Workday technologies and extend automation and SRE opportunities to adjacent services and technologies to further reduce toil and increase value to the team.

This is in line with his career goals.
